JDPMC ELECTION VIGILANCE DASHBOARD

Tracking the process, Strengthening Democracy

GENERAL INTRODUCTION: NATURE, STRUCTURE AND GOAL

JDPMC Election Vigilance Dashboard (JEVID) is the technical portal that archives and transmits findings of JDPMC on critical factors that shape election atmosphere, electoral processes, election results and election outcome in Nigeria.

JDPMC election vigilance initiative observes critical developments that shape democratic elections in Nigeria with the sole aim of aggregating and sharing relevant data that enable stakeholders act patriotically to orient such developments towards improved democratic elections in peaceful and just atmosphere established on the rule of law and commitment to human rights in the spirit of the social teachings of the Catholic Church.

Special interest in Osun Gubernatorial election by the initiative is informed by the strategic influence that it wields on general elections in Nigeria. Being the last before all general elections, it has remained since 2014 the ground where major political parties assert their popularity, and the strategies and disposition of stakeholders are open to test and public scrutiny ahead of the general elections.

METHODOLOGY: DATA COLLECTION AND VERIFICATION MECHANISM

JEVID deploys JDPMC's social networks, human, technological and institutional resources to scientifically collect, aggregate, interpret, process, and share primary and secondary data.

Trained trackers are deployed to track activities onsite, others aggregate news of activities from credible mainstream media sources, social media hubs and national dailies.

Trackers focus on activities of CBOs, FBOs, CSOs, NGOs, political parties, mainstream media, INEC, security agencies, NOA and Social media influencers through their onsite and online activities as well as reports and reactions to such activities by other stakeholders.

Credibility of data is ensured through various methods and processes of data verification and cleaning by a separate technical team.

SPECIFIC FOCUS

- Pre -election activities.
- Patterns of violent conflicts that directly or indirectly affect or are induced by election.
- Election and election outcomes: Stakeholders perception and reaction.

JEVID 2026/2027

JEVID 2026/2027 opens with the tracking of the pre-election activities of the 2026 Osun State gubernatorial election and closes at the end of the post 2027 General-election tribunal activities.
